

**2016 Aerospace Thematic Workshop  
"Fundamentals of fast Particle collisions  
with Surfaces "  
Aussois, 11-16 September 2016**

**POSTER SUBMISSION FORM**

Poster presentations offer a chance for wider participation in the conference as well as excellent opportunities to address specific issues and stimulate discussion. About twenty posters can be given on each of three days of presentations. We will be using the following guidelines to enhance the sessions:

1. All attendees, including invited speakers, are encouraged to submit a poster on recent advances in their work. However, posters presented by speakers should not duplicate material presented in their talks. The primary purpose of the posters is to enhance the discussion of forefront issues, so you are encouraged to include unpublished and/or controversial results.

2. Authors are expected to be available at their poster during the 20:30 – 22:30 session to which their poster is assigned.

3. **Your application to attend the conference must be approved (Jean-Pierre Taran's responsibility) before your poster can be accepted (Svetlana Starikovskaia's responsibility).** We recommend that you mail both the conference application and poster submission as soon as possible.

4. To facilitate planning, the absolute deadline is 30 June, 2016 for poster submissions. An accepted poster submitted by this date will be guaranteed space. We will accept post-deadline posters only if space is available.

5. Please attach a description (one page, plus figures if needed) and fill in the following information:

Name:

Affiliation:

Poster Title:

NB: If you or your group submit more than one poster, please rank your submissions in case of space limitations.

6. Email this form with the attached abstract(s) to

Prof.. S. Starikovskaia svetlana.starikovskaya /@/ lpp.polytechnique.fr

If you have questions or comments please contact Dr. Jean-Pierre Taran (taran /@/ onera.fr)
