**Save the date !**

Accompanied by its partners, the [Youth Antenna of the 3AF Hauts-de-France Regional Group](#) is organizing a Summer Space Festival on Sunday July 4 in Lille. Aimed at the general public, this unique event aims to transmit a passion, promote space activities in all their diversity and raise awareness of the challenges to come.

Supported by the Hauts-de-France region, the [European Metropolis of Lille](#) and the city of Lille, the festival will combine various presentations and activities on spatial themes (exploration, science, applications, etc.), in order to inspire and initiate the general public. More in-depth conferences and round tables, in English, will deepen these topics while opening them up to an international audience. The event will be broadcast live on various media in order to be accessible to a national and European audience.

**Face-to-face or on-line, come in large numbers!**
